## Cabinet Member Broward Williams Learns First Hand Of Florida's Institutions

"One of the principal duties of a Cabinet member is to assist in directing policies of Florida's Public Institutions, which include educational, correctional & remedial plants," says State Treasurer Broward Williams, "and being new, I feel that a first hand knowledge of the physical facilities, planned operation and implementation of prescribed policies is necessary to my participation in these decisions."

"Therefore, I have made this trip visiting Rairford, and the Glades Correctional along with hospitals and homes for the mentally retarded."

"As a Floridian, and a member of the Governing Body, I am highly pleased with the physical facilities, the operations as a whole. The personnel, I am sure, in most cases are dedicated — the Legislature has made available the money with which to bring salaries more

in line and we have been able to accumulate the professionally educated and experienced."

"Florida now, I am glad to say, has removed itself from the near the bottom to within approachable distance of the top in it's care of the State's wards."

Adoption of the Civil Service Code of rules was made at the last commission meeting.

"We had the benefit of Belle Glade's 12 years experience to fall back on in formulating rules," Craig said, "as our rules are patterned very much after theirs."

## Are We Asking For It?

No law can change the fact that a worker's wage—in sound business—is dependent on his worth as a producer.

In this age of the Great Society and numerous welfare and handout programs, people generally are losing sight of the fact that ATTITUDE toward one's job and toward his employer is the nucleus on which production is built.

The complete lack of understanding of this fact is indicated in the attitude today's crop of applicants for any job.

Many just pick up the phone—call a number—and indifferently inquire: "What are the hours?" "How much do you pay?" "What fringe benefits?" "Do you have an insurance plan?" "A retirement plan?"

Workers, who were schooled in the early thirties as job applicants, better appreciate that the job is NOT theirs just for the asking—just that fringe benefits must be earned—that the wage is open to the beginning salary be low—and that the potential requires HARD WORK and most likely LONG HOURS for the economic goal they seek.

To them, an approach of "This is what I can do."

This is the least I feel I can start for . . . "I'm not afraid of work . . . I love to learn . . . and in your organization I would find a great challenge." The answer to all their questions lie within themselves.

There is small conception among applicants or employees of the highly competitive climate employers are operating under in today's market. An attitude of—"Let the boss worry." prevails. High taxes, high rents and the cost of air conditioned comfort is no concern of theirs. But the bank account should never run dry in case they need "a little loan."

Where the present trend will eventually lead us is all too evident.

Man can make laws, but economic rules have a way of asserting themselves . . . and will surely one day do so to the loss of the so-called worker himself.

It's a sad fact that unemployment is largely created by man himself. It is unjust that fruits be handed out freely except as pay for justified attitude and effort which add up to production!

Must this lesson be learned through another depression?

## Bedrock

Love of freedom, respect for the individual, and a society dedicated to laws which hold inviolate the rights of property and persons are the bedrock upon which our country was built. Under the pressures of war, population growth, inflation and the complacency of prosperity, there has been a crumbling of this bedrock.

In ways too numerous to mention from the rising crime rate to the philosophical acceptance of continually depreciating currency, the people have shown a declining regard for the "American dream" which took root in our land nearly two centuries ago.

Never has there been a greater need for the people in all walks of life to take a renewed interest in public affairs and the actions of public officials, lawmakers

and legislative bodies. Especially is this true of businessmen. Speaking of businessmen, a leader in the business world, A. C. Rubel, retiring chairman of the Union Oil Company of California observes: "Many businessmen ask: 'Why become involved in the affairs of government?' I'm doing all right." The answer is that government has become deeply involved in the affairs of business—your business. As a businessman, you had better become involved or you will wake up one day and find you are on the outside looking in. By government, I include everything from the local school board to the Federal Administration in Washington."

This word to businessmen applies to everyone of us.

## You Do!

Suppose you work the standard eight hour day and are in an average income bracket. How much of that time goes to pay for elements that make up your cost of living?

Here are some examples: Food and tobacco cost one hour and 18 minutes; clothing and related items 30 minutes; recreation 19 minutes; transportation 39 minutes; medical expenses 21 minutes.

But there's another item that is bigger than any of these. It is taxes. They account for two hours

and 20 minutes of your working time—more than a quarter of the whole.

To put it another way, it means that you must work more than three months of each year before you begin earning money you can spend as you wish. Taxes take all that you make during that three-month-plus period.

The chances are that this will come as news to great numbers of people. They have small knowledge of the size and scope of the

tax bill, the primary reasons being that many taxes are hidden in the cost of the goods and services we buy and that most individual income taxes are paid through the withholding system, rather than being personally paid to the government by the earner. But, realize it or not, they are the biggest single item of expense to most of us.

In sum—who pays for big and wasteful government? You do!

## To Our Young People - - -

The decision you make now . . . during the next week . . . could be one of the most important in your lifetime!

If YOU are contemplating quitting school . . . or not going on in school . . . think long and hard before YOU become a school dropout. A sound education is, in today's society, the most important step on the road to rewarding achievement.

So you say: "My Dad didn't have much education and he's a successful man!" And look at my Uncle John!

Perhaps more young people are misled by this type of thinking than any other. They fail to grasp—and sometimes their parents and close friends do too—the fact that we aren't living in Dad's and Uncle John's young world.

The grave economic consequence of failure to complete high school is so pointedly evident that it is difficult to understand why so many youths ignore it. The fact that unemployment is three times higher among male school dropouts than among high school graduates, should, in and of itself, convince all youth of the folly of abandoning secondary schooling. But it has not done so.

The rate of school dropouts has grown to alarming proportions. Here are the hard facts:

More than one-third of the nation's young people quit school before completing senior high school.

Some 7.5 million youths will drop out of school during the next decade.

These youngsters who enter the labor market and are unable, at first, to find steady employment add considerably to the figures on unemployment posted each month by the Bureau of Labor Statistics.

Against these figures on unemployment, however, are other statistics on job openings, job availabilities. It shows there are more jobs looking for men than there are men looking for jobs.

Since the reasons behind dropouts are many and varied we believe that all segments of community life, spearheaded by educational, religious and civil groups, should join forces in a concerted attempt to stem the dropout tide.

The youth of any community is its most valuable asset and it is vital that the young people have every opportunity for successful careers in occupations of their choice.

During the coming week, perhaps you can play a vital role in influencing a student friend or neighbor that continued schooling paves the road to higher living standards—a better job—a greater opportunity to succeed.

## GRASSROOTS OPINION - Other Editors Say - -

WEYAUWEGA, WISC., CHON-

NICILE: "It is difficult to challenge any program, in principle at least, which purports to guarantee medical care for our older citizens, regardless of ability to pay. This is a laudable motive, certain to be popular, and therefore 'good politics.' But, it should be remembered that this, too, has a price which must be paid . . . The notion of social planners that this nation's economy knows no limits; that the cost of such programs can be effortlessly absorbed by ever-expanding production is foolish and dangerous. If our economy had such capabilities, prices would be at the levels they were 25 years ago."

WATERVILLE, WASH., EMPIRE-PRESS: "In our education process we should teach the relationship between economic and political freedom. It is also a matter of interdependence too. You can't substitute government fiat for

the free action of the market system without dire consequences."

ANGOLA, IND., STEUBEN REPUBLICAN: "Recreation periods are important if you want to lead a healthful and productive life, says the American Medical Association. But, activities should be approached intelligently. To get the most out of exercising and to avoid disabling injuries, the AMA recommends learning your capabilities and limitations, practicing healthful living habits faithfully, and understanding the risks involved when participating in an activity."

FROSTBURG, MD., CITIZEN:

"Did you ever stop to think how wonderful it is that you were born into a country where the greatest single problem is overweight?"

BENTON, MO., DEMOCRAT:

"Years ago the moon was an inspiration to poets and lovers. A few years from now it will be just another airport."

## SHORT AND SWEET

Teenagers are showing increased interest in politics and service activities, according to one university administrator. More 1965 applicants were concerned with these activities than ever before. . . . The report, issued by George Washington at the University of Rochester, indicated that the majority viewed political work both as a chance to gain experience for a career and as an outlet for expression.

The response of one student reflects to the trend. . . . He said: "I began doing volunteer work for my local political club and eventually became an elected student body officer. . . . This is surely the most moving, exciting and fascinating experience I've ever had. . . . I began meeting people on their own terms . . . and began feeling what others felt—frustration, love of freedom, hatred of inequality and so on. . . . I now see political action as my means for expression. . . . The trend indicates, according to Mr. Dockinger, that, as adults of the future, teenagers like them will be active citizens with an increased awareness of the world around them and a desire to participate actively in solving social problems."

## Uncle Dan From Doolie Says:

DEAR MISTER EDITOR:

This is the time of year when farmers and ranchers were flooded with pamphlets from their Government agencies in Washington. I reckon this was on account of they was trying to get us ready for a long, hard winter. My mail box has been stuffed full of this fine literature all week and I been so busy reading it I ain't had much time to help my old lady with the house chores.

First off, they was this item from the Department of Agriculture announcing that snuff-dipping was staging a comeback. This piece said they was \$50 million dollars worth of snuff sold in this country in 1964, and it was estimated six million folks in the United States was now using snuff.

This brings back memories. Mister Editor, of my boyhood days. I can recollect when my Pa, that was born the year General Grant took Richmond, used to have a black gun tree fer fer snuff brushes. He claimed didn't nothing make a good snuff brush like black gum, and he took better care of that tree than he did his plow and cultivator. He would keep a fruit jar full of brushes up in the medicine board in the livingroom and the neighbors was always dropping by to get one of Pa's fine gum snuff brushes.

I had forgot about this item in my childhood till I saw this piece from Washington. You don't see much snuff-dipping

these days and I would've guessed folks in this generation never heard of snuff, but it looks like I ain't been keeping up with the times in this matter.

Then they was this item from the Department of Fisheries stating that a fish keeps on growing as long as it lives. I ain't got no first hand information on this end of the fishing business, but I know fer shore that a fish that gets caught keeps getting longer and heavier as long as the feller that caught it lives.

And they was another item in one of them pamphlets telling about a survey made by the Library of Congress on our weather problems. It said we now got 18 Federal agencies spending \$432 million a year studying and reporting on the weather. The piece went on to say 7 of them agencies spent \$226 million last year studying and reporting on the exact same thing.

I aim to write my Congressman about this matter. First off, can't nobody do nothing about the weather after they get it studied and reported. Furthermore, after looking at that \$432 million figure, I'd say most of our weather problem was financial. I don't know, Mister Editor, how much literature comes to your desk, but if you ain't got your name in the pot fer the handouts from Washington, you could be unbeknownst in a heap of important matters.

Yours truly,  
Uncle Dan

DOUBT is the disease of this inquisitive, restless age. It is the price we pay for our advanced intelligence and civilization—the dim night of our resplendent day. But as the most beautiful light is born of darkness, so the faith that springs from conflict is often the best.

## Does TV Contribute

## To Juvenile Delinquency?

The destructive effect of some of the television shows which are currently engaging the attention of our young people—as well as many adults—has drawn the fire of some of the thinking citizens of our nation.

One mother who lives in Grand Rapids, Mich., wrote recently to a nationally syndicated columnist: "The current crop of TV shows is enough to make a person sick. I didn't think anything could be as bad as a steady diet of gangster stuff, killing . . . but I do believe that what we have to look at this season is worse. . . . Yesterday," she continued, "there were four shows which used as their format, 'School girls expecting babies.'"

TV and Delinquency  
A report signed by a majority of the Senate subcommittee on juvenile delinquency, headed by Sen. Thomas J. Dodd (D-Conn.),

charges that there is a conclusive link between crime and violence in television shows and juvenile delinquency.

After years of study and public hearings, the subcommittee reported that it found "on the basis of expert testimony and impressive research evidence, that a relationship has been conclusively established between television crime and antisocial attitudes and behavior among juvenile viewers."

The report also stated, "It is clear that television, whose impact on the public mind is equal to or greater than that of any other medium, is a factor in molding the character, attitudes, and behavior patterns of America's young people."

Our federal Supreme Court has taken the Bible and prayer out of the classrooms of our country and television has put violence and crime into our living rooms.

Can we wonder why there is so much immorality among the young people of the nation? Can we wonder why vandalism is becoming a feature of our society?

God Gave Them Up  
The Bible says, speaking of the people of a previous generation, "When they knew God, they glorified Him not as God, neither were thankful, but became vain in their imaginations, and their foolish heart was darkened. . . . And even as they did not like to retain God in their knowledge, God gave them over to a reprobate mind."

Each of us must choose what we will put into our minds—whether the trash which is so readily available, or the Word of God. The results will speak for themselves.

In the country of India, it is the custom to use a coconut and splash coconut milk on the hull of a ship instead of a bottle of champagne to launch it.

## Young Folks Are Invited To "Seventeen" Film

"Seventeen," the award-winning sound motion picture which answers to the problems of modern teen-agers, will be shown Thursday night, Aug. 26 at 8:30 at the Belle Glade Alliance Church.

"Seventeen" tells the story of a typical American high school in which an unusual thing happened. A group of students decided to meet for Christian fellowship and the study of the Bible. Led by a girl known as Linda, the Bible club flourished. Its influence reached to Jennifer, top student and steady girl friend of one of the school's bad boys. When Doug, the aptly named, the idea of "singing hymns

at school," Jennifer and herself confronted with one of the major decisions of her life.

The film is peopled by such memorable characters as Bingo, Daisy, Crepper & Skidoo. Football, hot rods and intrigue give the production sixty-five minutes of unforgettable drama. It has been screened in hundreds of school assemblies, churches & youth meetings across the United States & Canada, with several points also in regular use over seas.

The film is being sponsored by the youth group of the Alliance Church. Mrs. Ray Miller, the Youth Director, and all the young people cordially invite the youth of Belle Glade to attend.

## Los Angeles Week-End Harvest And The Messiah

REV. ORA SMITH  
Nazarene Church

The Gospel According to Saint Matthew throws light on the present day in a sermon found in the fifth chapter preached by the greatest preacher ever to live on earth. We are led to see here that happiness, fruitfulness, and conduct ALL have their basis in character. It becomes apparent before He is through that anger which leads to a loss of respect or reverence for the sacredness of the individual is not only dangerous but sinfully wrong. Let us trace its path with Him: One degree of bitterness is stirred in the heart as anger, the temperature rises as it fingers and reaches a new height in contempt of speech, finally — if allowed to remain — it bubbles out in the danger zone of rioting and murder! Such a path incurs the wrath of God from its beginning for it is based on hatred rather than love. (Heb. 12:15) (Businesses which operate because of a loss of respect or reverence for the sacredness of the individual are equally wrong and sinful).

Again, the "taught against thee" (biting, unjust criticism made of half-truths spit out of a tumultuous heart of bitterness aroused by the emotion of anger at the wrong things) is simply a continuation of Christ's teaching on the harmful effects of anger. True, "... a man's venom poisons himself more than his victim," but it may also poison the stumbling of another and our worship is unacceptable when such feelings are present against him. The follower after righteousness is to remove all such causes of offense. "Blessed are the peacemakers" — not the rabble rousers. "Agree with thine adversary quickly" rather than letting the seeds spring forth into an abundant harvest of evil. The fire must be put out by reconciliation as soon as possible.

Likewise, "Blessed are the meek," because they have a deep respect for the rights of others. God does intend that we be free of bad temper — uncontrolled bursts of anger, sullessness, peevishness and impatience! These marks of the Carnal Mind are enmity against God. They "are not, neither indeed can be, subject to His law." Such hearts need to be purified by faith. Happiness abides in purified hearts where love is allowed to reign for love "suffers long, is kind, is not provoked..." bear-eth all things... NEVER FAILETH! Even violent agitation against such a heart causes it to spill out love rather than bitterness.

Thus, we see that Jesus' answer for our day is not rioting and drunkenness, but the transforming power of love from a Spirit-filled life! (Eph. 5:18) In parallel passages of Scripture we see where the Son of God PROMISED such a life for each of us, (Acts 1:8; John 14:14-17; Acts 2:38) went on to COMMAND it in, (John 16:7; Ephesians 5:14-18) PRAYED FOR YOU TO RECEIVE this baptism of love through the Holy Spirit of God indwelling your heart purified by faith in John 17:17-21 and we have evidence that many received such a baptism. (Acts 2:1-4).

Do as Hebrews 12:12-15 admonishes Christians to do. Let Christ's way be your way instead of the Los Angeles way. Have you received your Baptism of the Spirit which fills the heart with pure love? Read the above Scriptures, believe God and ask Him to make it so in your life.

Read Mark 10:1-16

If any man come to me, and hate not his father, and mother, and wife, and children, and brethren, and sisters, yes, and his own life also, he cannot be my disciple. (Luke 14:26).

The above text is one of the most misunderstood in the New Testament. Many people have either passed it by as being too harsh to follow, or have actually thought that Jesus meant that one has to hate his family or he cannot love Christ.

Jesus looked up on the home a man and his wife made and the children in it as blessed, and said that such a home was intended from the beginning. Jesus also said that a man must hate his family in order to follow Him and do His will.

There seems to be a paradox in Jesus' teaching concerning the home and discipleship. The paradox is understood when we see that Jesus' strong words simply mean that we are to Put Him and His Kingdom first in our lives.

Putting Christ first in our lives and homes makes for the finest and strongest type of home the world knows. The home is destroyed only when we leave Christ out. PRAYER: Our Father, give us faith to follow Thee closely, and the courage to build Christian homes, in a day when both are so needed. For Jesus' sake, we ask these things. Amen.

THOUGHT FOR THE DAY  
When Christ has first place in our lives, we give Him first place in our homes.

# Make STRONG COMMUNITIES

Would you like to be as young as she is? Would you like to wake up tomorrow and find yourself standing in a field of Queen Anne's lace, with the summer breeze blowing and fleecy white clouds sailing overhead?

Would you really like to be as young as she is? If you've been measuring up to life, the answer should be no. Naturally, you can look at her with nostalgia. But think of the lessons she has yet to learn — lessons you learned long ago. Add up your experiences, both good and bad, which wouldn't be yours were you to revert to youth. The total should make you glad that you are exactly the age you are.

If you aren't something's missing. Somewhere, you've gotten off the track. In this case, you don't need to return to childhood. You need, rather, a new approach to adulthood, a new grasp, a new understanding. Start finding it now... in the church of your choice.

## THE CHURCH FOR ALL

ALL FOR THE CHURCH

The Church is the greatest force on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a church, neither democracy nor civilization can survive. There are four reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For the sake of his community and nation. (3) For the sake of the Church itself, which needs his moral and material support. (4) For the sake of his church regularly and read your Bible daily.

## Football

The Football teams from Belle Glade and Pahokee High Schools give much promise for this 1965 year. Mr. Bill Burke is coach for the Rams and Webb Peil for the Pahokee Blue Devils. Last season they made a score of 4-5-1 with a veteran backfield, directed by southpaw quarterback Tony Letour, who is good on short throwings, and is already recuperated from his arm fracture. Also back in the game are fullback Gary Walker and running back John Lee Henderson and Pat Gilbert.

In coach's list are Ray Sullivan and Gary Wall veterans who return to the offensive and defensive units.

The Belle Glade team has Bryant Davis, expert on passer. And George McDonald as receivers. Johnny Williams quarterback is also a fair thrower.

In Pahokee High we find Tony Molares, a newcomer. And among the figures outstanding from last year's season, John Peil, has the possibility of continuing as quarterback.

## Softball

Last Saturday at the Baseball Park, in Belle Glade, a softball game between the Glades Sugar House team, and the Pahokee Cubans, took place. This last one resulted great champions, winning 13-1. But the Glades are suspecting some professionals in the Pahokee team, and they are investigating.

The components of both teams were:  
**GLADES SUGAR HOUSE:** Jimmy Dees, left field; Douglas Williams, shortfield; Hector Stone, 2nd base; Jose J. Garcia, 1st base; Norton Seigler, rightfield; Jacinto

Agramonte, shortfield; Eugene Nichols, pitcher; Norberto Duenas, centerfield; A. L. Ballard, catcher.

**PAHOKEE CUBANS:** Junior Rios, shortstop; B. Rodriguez, 2nd base; Posa, 3rd base; Reinaldo Molares, centerfield; Noly Montero, leftfield; Roger Serra, 1st base; Frank Diaz, rightfield; Ramon Molares, outfield; Hector Llorens, pitcher and manager the team. Tony Molares, catcher.

Among the spectators there were relatives of the players: Marina Duena, Ma. Elena Montero, Carmen Llorens, Yolanda Diaz, Erena Serra, Hilda Rodriguez, Hilda & Fidel Fleites, Fina & Pepe Larroendo, and Jorge Silva. Lots of kids attending.

The victory was celebrated later on with a barbecue at Seven-Fifteen picnic park of Lake Okeechobee. Attending the barbecue were Olga and Silvio Garcia.

Next Sunday at 1:30 they will celebrate the revenge, retaliation game here in Belle Glade, at the baseball park.

Numerous complaints from residents resulted in action by South Bay City Commission to curb motorcycle races in that city.

At the last commission meeting, City Clerk Herbert A. Craig was instructed, after much discussion by the commissioners, to inform South Bay Motorcycle Club that there are to be no more motorcycle races.

Although the races have been officially starting at 2:00 p. m., on Sundays, drivers reportedly have been practicing as early as 5:00 a. m.

# Activities, Events Of Our Latin Neighbors...

Repeated requests from many of our readers have been received that news items about "Latin Colony" be also published in English. So many of these people are our close friends and neighbors and we can't read Spanish.

The engineers Alberto Villagel, Antonio Arce, and Mr. Carlos Reinaldo residents of West Palm Beach who work for Glades Sugar House, presented with sorrow the terrible accident that happened last week on the Palm Beach Rd. where lives of members of Belle Glade families were lost, when a car skidded into the canal.

Villagel, Arce and Reinaldo, when they observed the tragic fall of the auto, plunged into the canal to help bring out the victims.

We congratulate heartily these three persons for their courage and entirety in that tragic moment.

Messrs Tony Bondad and Manuel Salvador came on jet plane from Ohio to attend their brother-in-law's interment, Victor Cabildo, r. l. p. Also present were several of his relatives, with their children; some residents of Moore Haven, and others who arrived from Georgia.

On August 15th, day of the Assumption, is Mrs. Carreno's saintday, and we are happy to congratulate her. Her grandchildren Judy Robert and Freddy Pata Carreno, are spending an agreeable stay at their grandparent's home, here in Belle Glade.

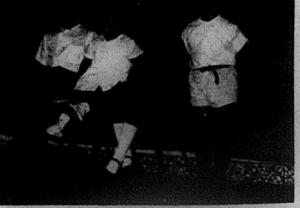

In Miami, some 200 exiled boys, ages ranging 10 to 14, are also organizing baseball games and Little Leagues. They are called "The Little Cubans" and have organized 12 teams. Their coach is Emilio Cabrera, ex-manager of the Almendares Club in Havana. Directing them also are baseball stars such as Sandy Consuegra. The small boys 10-12 are called Broncos. The older ones 13-14 are Ponies. The six Bronco teams wear the names of the six Cuban provinces. And those of the Ponies, wear the names of the four baseball teams in Cuba: Habana, Almendares, Cienfuegos, Marianao.

THE CUBANITOS have rules to follow such as not to let their hair grow like those of the Beatles, not to wear their pants too tight. And they should respect their parents and superiors. They were crowned champions of East Florida. And have competed in Georgia, Massachusetts and Alabama.

The kids contribute \$5.00 to be members, and this serves for life insurance, cost of uniforms and equipment.

When the Cubanitos played at the Miami Stadium August 6th, the game was

full of emotion. Young pitch- er Eutimio Leal was outstanding. 4,400 exiles attended, bringing an entrance fee of \$2,200. They opened a bank account in the name of Cubanitos.

Paul, Teresa, Pancho & Cristina Mansfield, arrived from Tripoli, Africa, and are staying in Key Biscayne, at their parents' home. Their lovely kids: Paul, Teresa, Pancho and Cristina, came with them.

Young Luis A. Espinosa, Ana and Armando Espinosa's son, was 10 years old on August 12th, and he celebrated with a reunion Sunday, together with his parents, grandparents, brother Juan Carlos, cousins and uncles and aunts, last Sunday. Congratulations.

Margarita Fdez Villaurruti and Pablo Cano, residents of Miami, left Monday August 16th, to spend a few days at Saratoga Springs. Will continue their trip to Tampa, visiting their sister and nephew and nieces. And on their return trip they will pass thru Belle Glade, and stop to pick up their niece Dulce Maria Tarafa, who will spend at their home in Miami, a few days vacation.

Mr. Chano Sampedro has already spent two weeks at a Miami Hospital, due to a serious car accident, in which his car turned over. He was accompanied by Mr. Telichea.

Sampedro was subjected to a spinal column operation. His wife Lala Carreno of Sampedro, is with him. Everybody is hoping he will recover soon.

Back in Belle Glade, from spending their vacations up North, we find Aida and Alfonso Arias with their daughter Norma. And in Pahokee, Nene and Permin Presno with their kids Rosalia and Fermin, Jr.

Also just returned to Belle Glade, we find Gina and Gustavo M. Godinez Cely and Oscar Varona and their children, also Mr. and Mrs. Roqueta.

Three banns have been published at St. Philip Ben- izi Church, for the wedding of Miss Martha Juliana Vazquez and Mr. Pedro Molina, which will take place Thursday, September 2nd. With joy and happiness this wedding is awaited.

Mrs. Varona, Mrs. de Soto, Mrs. Manuel

### Confidential White House Briefing on Viet Nam Situation

Last Monday I was among the Senators who received an off-the-record briefing at the White House on the United States' position in Viet Nam. We heard comprehensive evaluations from President Johnson, Defense Secretary McNamara, Secretary of State Rusk, General Maxwell Taylor, our former Ambassador to Viet Nam, United Nations Ambassador Goldberg, Governor Harman, and Eugene Black, former head of the World Bank.

These experts presented the current picture from their varying political, military and economic viewpoints, and then invited unlimited questioning on any phases of the problem. The meeting was of a highly confidential nature, but the presentations and responses to questions were frank and informative with no effort made to "sell" us on a particular course of action.

I came away from the session with the impression that our policy is one of thoughtful and commendable firmness, and that our best minds and talents are devoting complete attention to this dangerous and complex problem. Our future policy in Viet Nam should be dictated by national self-interest and the long-term gain rather than by international opinion and propaganda.

The President is to be commended for his policy in giving members of Congress an unrestricted view of the problem. This policy should help each of us to make sound individual judgments when the Congress is called upon for supporting action.

### MILITARY PAY INCREASE APPROVED

I was glad to support the bill passed in the Senate this week to increase the basic pay for members of the armed forces. As approved by the Senate, the measure provides for greater increases than those sought in the budget

granted by the House when it considered the bill.

I heartily agree with Senator Russell, Chairman of the Armed Services Committee, who stated from the floor: "In my opinion, it is essential to our national security to seek to achieve a certain degree of equity in our military compensation system and to do everything that is possible to retain qualified and highly trained personnel."

### DIRKSEN REAPPORTIONMENT AMENDMENT REJECTED

Failure of the Dirksen reapportionment amendment to pull the required two-thirds affirmative vote in the Senate last week was disappointing because this leaves still unresolved the vital matter of equitable apportionment of one house of the state legislatures. The amendment, of which I was a co-sponsor, reserved to the citizens of each state the right to apportion one house of their legislatures on some basis other than strictly on population.

Although the amendment carried by a vote of 57 to 39, it did not receive the required two-thirds vote that would have sent it to the individual state legislatures for decision.

The issue will continue to be a troublesome one — particularly for states of either sparse or greatly-imbalanced populations — and I am glad that Senator Dirksen has indicated that he will continue to seek an appropriate occasion to offer his amendment.

### CONTROVERSIAL VOTING RIGHTS BILL SIGNED INTO LAW

On August 4 the Senate voted, 79 to 18, to adopt the conference report on the controversial voting rights bill, and two days later the President signed the bill into law. I opposed the legislation from start to finish on the grounds that it is both unwise and unconstitutional. However, I am glad that the conferees deleted in conference two particularly bad provisions of the bill.

The first deletion removed from the effort to repeal, by federal statute, state or local poll taxes which, in my opinion, can be accomplished only by constitutional amendment. Secondly, the conference killed the most punitive triggering device by which federal registrars could be sent by the Attorney General to counties in which less than 25 percent of the eligible Negro voters are registered, regardless of whether any showing of actual discrimination is made.

### NEW CABINET POST

A new Cabinet agency, the Department of Housing and Community Development, generally referred to as the "Urban Affairs Department," will soon come into existence as the 11th Cabinet office. The Senate passed the bill providing for this new agency this week by a vote of 57 to 33, while the House had previously passed a quite similar bill. The minor differences will soon be ironed out and the President will sign the bill. I opposed this legislation since it will create a needless and confusing over-lapping of federal functions, and because it is a part of the present effort to over-extend the centralized federal government while further weakening and downgrading the states. In my opinion the federal government is already TOO BIG, TOO EXTRAVAGANT, and TOO INEFFICIENT

### Vets Compensation Soc. Security Clash

Melvin T. Dixon of the Fla. Dept. of Veterans Affairs, warned veterans and widows today that a lump sum payment representing the retroactive benefits to January 1, 1965 will be received by Social Security recipients during the month of September 1965. Those receiving VA pension and parents receiving dependents' indemnity compensations benefits where entitlement thereto may be affected because of the retroactive benefits and the increased monthly benefits, should immediately notify the Veterans Administration in order to prevent a Veterans Administration overpayment.

Dixon further stated that any veteran receiving VA pension and Social Security should sharpen their pencils to determine their total income from all sources, including the seven percent Social Security increase for the year of 1965 to determine whether their income will be in excess of the income bracket.

## FCD Tax Rate Lowered

Forty per cent of Florida's population — more than 2.4 million people — will realize benefits in the coming year from a tax cut voted by the Governing Board of the Central and Southern Florida Flood Control District.

Meeting at Ft. Myers the Board slashed its millage from 75 to 45 of one mill.

This means that in the 18 counties of the FCD, property owners will be paying 45 cents per thousand dollars of non-exempt prop-

erty value, instead of 75 cents per thousand, as in the past year.

Ed Dail, FCD Executive Director, told the Governing Board that several sources have reassessed property this year in accordance with the State Supreme Court ruling which called for assessments at 100 percent of fair market value.

The total of assessed valuations in the 18 counties has climbed from \$3.9 billion in 1964 to \$4.6 billion.

total of more than \$11 billion," Dail said.

The new millage is the lowest ever voted by a Governing Board of the FCD. In 1949 when the FCD was created, the State Legislature set a 3-10 of one mill levy, which was in effect a number of months. But since 1950 the levy has never been as low as the new rate.

The budget adopted by the FCD Board last year called for \$6,000,000 in District taxes. But this year's budget requires \$4,654,416.

FCD taxes are used principally for acquisition of land and rights of way and for operation and maintenance of completed works.

The funds for construction of new works — canals, levees, spillways, dams, and pumping stations — come from state and federal appropriations.

In spite of the tax reduction, several counties will be paying more than last year because of reassessments. For example, Palm Beach County assessments jumped from \$1.1 billion to \$2.3 billion. The FCD levy in Palm Beach County will increase from \$27,527 to an estimated \$1,956,206 even with the reduced millage.

Most counties, however, will realize tax reductions.

### Partners In Prosperity

Over a period of many years Americans have come to be regarded as the world's foremost joiners. The reputation is well deserved. We join youth clubs, bridge clubs, civic clubs, social clubs, athletic clubs and a host of others by the hundreds of thousands.

"The proliferation of organizations devoted to everything from archery to zoology is probably a very good thing," one social commentator has remarked. "These clubs serve to satisfy both our wide variety of interests and our fondness for group activities."

Under the circumstances, it's little wonder that America's club-oriented society has seen a remarkable growth in investment clubs. On the basis of re-

### 4-H Science Activities Interesting

American young people's interest in science lagging? "Not so," says T. W. Thompson, service director for the National 4-H Service Committee. And he backs up his statement with facts taken from records representing some 78,000 inquiring 4-H entomologists.

Thompson pointed to the record of a 15-year-old New York Miss who was instrumental in organizing an International Teen Entomology group. Her 4-H project has broadened and now she supplies moth eggs to the state agricultural experiment station, museums, and to entomologists in this and other countries. This summer the young scientist plans to study with an entomologist in England and after her return in the fall, an Australian Miss will join her in the study of entomology.

A New Mexico 4-H youth

has amassed a collection of more than 1,000 insect specimens. The collection has been used in the instruction of 4-H members and school science classes. His interest has been directed to the control of insects on crops and he now assists airplane pilots during flights in his area.

Many other 4-H entomologists share their knowledge with others. An Indiana University student plans to write about the world of insects after graduating with a degree in Journalism and zoology. Her 4-H insect collection is on loan to her state's 4-H training center. An Idaho girl has her own newspaper column advising readers on methods of insect and pest control. She hopes to become a member of the Peace Corps.

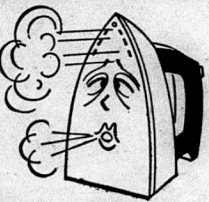

"Yes," Thompson agreed, "these are some of the most successful examples in the program carried on by the Cooperative Extension Service. Each was designated a 1964 national winner along with a Kansas girl and a Mississippi youth. Each received appropriate recognition in the form of a \$500 educational scholarship which will be used in further scientific study."

Thompson further noted six \$500 educational scholarships are available again in 1965 in the National 4-H Entomology program. Sponsor of the program for the 14th consecutive year is Hercules Powder Company. In addition, each state winner receives an expense-paid trip to the 44th National 4-H Club Congress in Chicago, Nov. 28 - Dec. 2. Medals of honor are awarded county winners, the National Committee spokesman said.

## Rogers To Speak

(Continued From Page 1)

"To have one who makes it an objective to let his votes in the Halls of Congress express the desires of his constituency, and goes to great lengths to know what their views really are, is refreshing in these days of steam-rolling politics in our National Congress," the Chairman continued.

President Pete McClellan appointed the "Doc" to the Chairmanship of this committee because of his active interest in the Chamber's work," according to the President.

The annual membership meeting of the Chamber was resumed last year with a capacity house — over 200 attended and the Committee is offering the membership enticement to be there.

The place of the banquet has not yet been decided, nor has the complete menu been selected, but according to Pete and John Grady the entire function will be "strictly first-class and Up Town."

## The South Bay City Commission

(in office at that time)

## DID NOT INFLUENCE BY SUGGESTION OR ACTION THE INDICTMENT OF MARVIN DAVIS!

The Sheriff and County Solicitor conducted an investigation and presented evidence to the Grand Jury, which indicted the then Chief of Police.

Indulging in "mud slinging" is not tasteful, but it must be shelved off when it is intentionally slopped on.

Apparently Mr. Davis is appealing to the sympathy of the voting public of South Bay through the suggestion that the then City Commission is responsible for his plight, or "mistreatment."

The Commission made many overtures to gain the Chief's cooperation; at least two meetings were held with him by the Commission asking for his cooperation as prescribed by the Charter.

The City Attorney read and interpreted for him the City Charter.

He was offered Civil Service Status if he would support a referendum.

When efforts towards cooperation failed, coupled with continued illegal actions which jeopardized the City's financial position, the City Commission discharged Chief Davis for misfeasance and malfeasance in office.

The City of South Bay's progress has been aborted through influenced elections by the office of Chief of Police.

The progress of the City since the Chief is SELECTED instead of elected speaks for itself.

The change of dates for the election by the present Commission was to enable the elected Commission to prepare the budget under which it would operate — not one prepared by the lame-duck Commission.

Mr. Davis appears to be fearful that many migrant farm laborers will not have returned by the new election date, assuming they would vote for him.

Law-bending, changing or being added to, for or against, any ONE man is not a part of South Bay's present Commission.
